Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Saturday 31 Jul 2021

++ Valid for broadcast between 0600 and 1800

Headline:
A few outbreaks of rain spreading south. Some brighter intervals.

Today:
A rather cloudy start, with outbreaks of rain and drizzle, most frequent towards northern coasts. Best of the brighter spells will be in the south and west. Cloud spreading south later, with afternoon showers possible, but also further brighter intervals. Maximum temperature 17 deg C (63 deg F).

Tonight:
Remaining rather cloudy, especially in the south, with only limited clear spells. A few outbreaks of mainly light rain or drizzle possible, although most parts dry by dawn. Minimum temperature 10 deg C (50 deg F).

Sunday:
Early cloud clearing south, with brighter or sunny spells following. A mostly dry day then expected, with variable cloud and just the outside chance of a shower. Fresh coastal winds. Maximum temperature 17 deg C (63 deg F).

Outlook for Monday to Wednesday:
Mainly fine Monday and Tuesday with sunny spells and just the odd shower possible. Breezier with a greater chance of heavier showers Wednesday. Feeling rather cool for early August.
